

HEGAWA REPAIR CLAMP HS-2

FOR WATER AND GAS SERVICE

Hegawa double band repair clamps are suitable for the repair of ALL pipe types. GRP and PE pipes can be repaired with specially adjusted repair clamps: ask your distributor or Hegawa.

Following types of damage can be repaired:

Material specification

- Metal parts: stainless steel AISI 304 or AISI 316L.
- Nuts are made from stainless steel AISI 316 and are coated with molybdene to prevent galling.
- Stainless steel washers.
- All parts have been rounded and have undergone chemical treatment after welding to return the corrosion resistance to its original state.
- Available rubber gaskets NBR - EPDM compounded for water-gas and sewer service. Other compounds are available on request.
- The rubber is tapered and has a waffle pattern.
- Bridge plate is vulcanized into the rubber gasket
- Double folded lifter bar.
- No loose parts that may get lost during installation.

Available sizes

From DN 80 up to including DN 700.
Larger Pipe diameters can be repaired by our HS-3, triple band clamp.
