

## HEGAWA

### STEEL REPAIR CLAMPS FOR WATER AND GAS APPLICATIONS

#### Application

Hegawa manufactures a range of Steel Repair Clamps up till DN 2500 mm. The steel clamps consist of 2 halves. They are engineered to the specific needs of the customer and are suitable for working pressures up to 40 bars. They can be used for water- as well as for gas applications.

#### Technical concept

The clamps can be supplied with EPDM or NBR or Viton rubbers. The rubber is tapered and has a waffle pattern. The bridge plate is vulcanized into the rubber gasket.

Furthermore the clamps can be supplied with threaded- or flanged outlets.

The clamps can be used to repair all types of cracks, holes and fractures. It can be installed under pressure.

The steel clamps will be coated with a high quality epoxy powder, drinking water approved, with an average coating thickness of 250 microns.
